

LISTING OF CLAIMS

1. (Currently Amended) Light guide for lighting of a vehicle,
~~preferably motor vehicles, having at a said light guide comprising: at least one connection side for at least one lighting means, having light source; reflecting surfaces lying transverse to the direction of the rays emitted by the lighting means light source, and having a light exit side, characterized in that wherein the reflecting surfaces (13,14) lie transverse to the direction of the rays and offset from each other, and, viewed in the direction of the rays, adjoining each other with essentially no gaps.~~

2. (Currently Amended) Light guide according to claim 1, ~~characterized in that wherein the reflecting surfaces (13, 14) are of equal size.~~

3. (Currently Amended) Light guide according to claim 1 or 2,
~~characterized in that, wherein the reflecting surfaces (13, 14) lie parallel to each other.~~

4. (Currently Amended) Light guide according to ~~any of claims~~ claim 1 to 3, characterized in that wherein the reflecting surfaces (13, 14) lie at 45° to the direction of the rays on the lighting means (8, 11) light source.

5. (Currently Amended) Light guide according to ~~any of claims~~ claim 1 to 4, characterized in that wherein neighboring reflecting surfaces (13, 14) lie at a distance from each other.

6. (Currently Amended) Light guide according to any of claims claim 1 to 5, characterized in that wherein neighboring reflecting surfaces (13, 14) are separated from each other by projections (17, 20) of the light guide (1).

7. (Currently Amended) Light guide, in particular according to any of claims claim 1 to 6, characterized in that wherein the light guide (1) consists of comprises at least two light guide parts (5, 6) which, viewed in the direction of the rays, lie side-by-side and, at their mutually opposed faces (7, 10), each comprise comprising at least one lighting means (8, 11) light source whose light rays are reflectable at opposingly inclined reflecting surfaces (13, 14) to the light exit side (4).

8. (Currently Amended) Light guide according to claim 7, characterized in that wherein the reflecting surfaces (13, 14) of the light guide parts (5, 6) are arranged at gap.

9. (Currently Amended) Light guide according to claim 7 or 8, characterized in that wherein the light guide parts (5, 6) are alike in shape.

10. (Currently Amended) Light guide according to any of claims claim 1 to 9, characterized in that wherein the connection side (7, 10) for the lighting means (8, 11) light source is the face of the light guide (1) and lies perpendicular to the direction of the rays of the lighting means (8, 11) light source.

11. (Currently Amended) Light guide according to any of claims claim 7 to 10, characterized in that wherein the two light guide parts (5, 6), viewed in the direction of the rays, lie side-by-side.

12. (Currently Amended) Light guide according to any of claims claim 7 to 11, characterized in that wherein the width of the reflecting surfaces (13, 14) of the one of said light guide part parts (5, 6) corresponds to the distance of neighboring reflecting surfaces (14, 13) of the other of said light guide part (6, 5) parts.

13. (Currently Amended) Light guide according to any of claims claim 7 to 12, characterized in that wherein the two light guide parts (5, 6) are of equal width.

14. (Currently Amended) Light guide according to any of claims claim 7 to 13, characterized in that wherein the reflecting surfaces (13, 14) of the two light guide parts (5, 6) are of equal size.

15. (Currently Amended) Light guide according to any of claims claim 7 to 14, characterized in that wherein the two light guide parts (5, 6) are configured in one piece with each other.

16. (Currently Amended) Light guide according to any of claims claim 1 to 15, characterized in that wherein the lighting means (8, 11) light source is at least one LED.

17. (Current) ~~Amended~~ Light guide according ~~any of claims~~ claim 1
to 16, characterized in that wherein the light exit side (4) is provided with scattering
and/or refracting optics (27).
